

AMITH T

Data Analyst

Chicago, IL | (312) 555-0184 | amith.t@email.com | linkedin.com/in/amith-t | github.com/amith-t | amith-t.github.io

PROFESSIONAL SUMMARY

Data analyst with 4+ years working across financial services and retail, mostly in SQL, Power BI, and Python. Day-to-day work includes building dashboards business teams actually use, automating reports that used to be manual, and digging into churn, conversion, and inventory questions. Finished an MS in Business Analytics at DePaul in 2025.

TECHNICAL SKILLS

Languages & Querying: SQL (T-SQL, PostgreSQL, MySQL), Python (Pandas, NumPy, Matplotlib, scikit-learn), DAX, R (basic)

BI & Visualization: Power BI, Tableau, Excel (Power Query, Pivot Tables, VBA), Looker Studio

Data Engineering: Snowflake, Google BigQuery, SSIS, ETL/ELT pipelines, Airflow (basic), dbt (basic)

Analytics & Statistics: A/B Testing, Hypothesis Testing, Regression, Time-Series Forecasting, Cohort & Funnel Analysis

Tools & Platforms: Git/GitHub, JIRA, Azure Data Factory, AWS (S3, Redshift basics), Agile/Scrum

PROFESSIONAL EXPERIENCE

Data Analyst | BrightPath Financial Services, Chicago, IL **Feb 2025 – Present**

- Built 12 Power BI dashboards covering the loan-servicing portfolio; the operations dashboard is now the default view in the team's weekly review, replacing three separate Excel reports.
- Automated the weekly operations report with Python and SQL stored procedures, cutting prep time from about 10 hours a week to under 1.
- Ran a churn analysis using cohort segmentation and logistic regression; the at-risk segments fed a retention campaign that lifted renewals by 8%.
- Work with finance and operations leads to pin down KPI definitions and maintain the data dictionary, since the same metric was being calculated three different ways across teams.

Data Analyst | Zentrix Technologies Pvt. Ltd., Hyderabad, India **Sep 2021 – Mar 2023**

- Built SQL ETL workflows pulling sales data from five source systems into Snowflake during the client's warehouse migration; report refresh went from overnight batch to under an hour.
- Created Tableau dashboards for a retail client tracking inventory turnover across 200+ stores, which helped buyers spot overstock earlier in the season.
- Analyzed A/B tests on the client's e-commerce checkout flow and recommended the winning variant, a 6% lift in completed checkouts.
- Mentored two junior analysts on SQL query tuning and dashboard layout.

Junior Data Analyst | NovaSoft Solutions, Bengaluru, India **Jan 2020 – Aug 2021**

- Cleaned and validated customer datasets (1M+ records) in SQL and Power Query ahead of a CRM migration, including deduplication and fixing inconsistent address formats.
- Automated the monthly business review pack in Excel/VBA, cutting turnaround from 3 days to a few hours.
- Supported senior analysts on KPI scorecards and root-cause analysis when revenue numbers didn't match between systems.

PROJECTS

- E-Commerce Sales Analytics Dashboard:** cleaned 500K+ transaction records in Python, modeled a star schema in BigQuery, and published a Power BI dashboard covering pricing, seasonality, and regional trends. Code and writeup at github.com/amith-t.
- Chicago Divvy Bike-Share Demand Forecasting:** station-level demand forecasting (SARIMA, Prophet) on 12 months of public ride data, published as a Tableau Public story with rebalancing recommendations.

EDUCATION

MS, Business Analytics | DePaul University, Chicago, IL **Sep 2023 – Jun 2025**

Coursework: Data Mining, Database Design, Predictive Analytics, Data Visualization, Statistics for Business

B.Tech, Computer Science | JNTU Hyderabad, Hyderabad, India **Jun 2015 – May 2019**

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300), 2024 | Tableau Desktop Specialist, 2024

Google Advanced Data Analytics Professional Certificate, 2023 | SnowPro Core (Snowflake), in progress
